Art Fundamentals Class #20:

Drawing Facial Features: Lips

1. *True or false?:* Lips are the only facial feature actually affected by movable bones and they're also surrounded by lots of muscles that allow for lots of different expressions.

2. What is the protruding area of the face between the nose and the chin where lips are located called?

3. Label the following parts of/around the lips.

4. What are the *tubercules*?

5. What's the issue with leaving teeth completely white in a drawing or painting?
